Martin,

I have included a new attribute for auxiliary power consumption at <wagon> element.

```
<xsd:extension base="wagonType">  
  <xsd:attribute name="auxPowerConsumption" type="xsd:decimal" use="optional">  
    <xsd:annotation>  
      <xsd:documentation>continuous power consumption in kW of auxiliaries within one  
car</xsd:documentation>  
      <xsd:documentation>V1.01 added</xsd:documentation>  
    </xsd:annotation>  
  </xsd:attribute>  
</xsd:extension>
```

The new schema version will be published in due course.

Regards

Jörg von Lingen
