Dear Alexander

From my point of view, railML with an <openEnd> tag under <switch> is just not valid. I would consider this a bug in the corresponding program.

You didn't say which program produced this, but if it is OpenTrack I would be interested in knowing more about this bug, since I would have to fix it. ;-) If this is the case, please feel free to send me a bug report by email.

Best regards
Bernhard Seybold
