
Subject: Unclear wiki description of attribute operationalStopOrdered

Posted by on Tue, 21 Jul 2015 14:27:32 GMT

Hello everyone,

the wiki description of the attribute operationalStopOrdered of the element stopDescription says "This indicates that the stop is requested by the infrastructure manager.". In my opinion the name of the attribute indicates an inverse meaning:

- operationalStopOrdered = True: The stop is ordered by the operational undertaking, e.g. for staff exchange
- operationalStopOrdered = False: The stop is arranged in responsibility of the infrastructure manager.

The examples on the wiki page are already labeled in this way, so I assume that the description is a misunderstanding. I suggest to change the description to "This indicates that the operational stop is requested by the operational undertaking / TOC." optionally with the explanation "e.g. for staff exchange" to clarify its usage.

Best regards

Christian Rößiger
