> From the next major release on this enumeration values should be renamed
> to "raising" and "falling". See also Trac ticket #145 [1]
>
>> therefore differ from the usage of the attribute mileageChange.dir,
>> where 'dir' of course refers to the _absolute_ mileage direction.
>
> From the next major release on this attribute should be renamed to
> "absDir". See also Trac ticket #144 [2]

after discussion with the other schema coordinators, we decided not to wait until the next major release and started with the implementation within railML 2.2 (see [3]):

The <mileageChange> element gets a new optional attribute "absDir", which provides the values 'raising' and 'falling'. It will replace the current attribute "dir" with the next major release and will become required then.
