Subject: intervalGroup
Posted by markus.ullius on Fri, 13 May 2005 14:20:05 GMT

Hello

Is there an intervalGroup-element in the timetable-schema? There is an intervalGroupID in the train
element and also the example files uses this attribute but I cannot find a cooresponding intervalGroup
element defining the intervalGroup.

Does this element exist or did I miss something?

Thanks & best regards
Markus

Hello Markus

There is no element intervalGroup in the timetable schema but all the trains having the same intervalGroupID build the intervalGroup together.

Example: The trains 100, 102, 104, ..., 120 are members of a regular interval service (e.g. every 60 min.). In RailML they all had the same intervalGroupID (e.g. "S10.southbound").

Best regards

Dani
