Subject: Timetable scheme V1.03 released Posted by Joachim Rubröder railML on Fri, 26 Jan 2007 16:38:52 GMT View Forum Message <> Reply to Message

The latest version of timetable scheme is available on the RailML-Server. There were quite a lot of new elements and attributes introduced since version 1.0. I grouped them according to the changes presented at the last meetings.

Please check, if your proposal is included in the right way.

Regards, Joachim Rubröder
