Subject: Rolling Stock Circulation in railML Posted by Susanne Wunsch railML on Thu, 31 Jul 2008 20:29:15 GMT View Forum Message <> Reply to Message

Hello,

On July, 16th 2008 some people met in Dresden, in order to start developing extension of current railML schemas in the field of "rolling stock circulation data".

Results (in German) can be downloaded from railML-Website (-> "Events").

Who is interested in developing this branch of railway relevant data? Please send an email to coordination@railml.org to get involved.

Kind regards, Susanne
