Dear Colleagues,

during our last meeting in Dresden we agreed to held the 9th conference in spring 2006 in Vienna (Austria) on invitation of SIEMENS Austria. We agreed to have this meeting on Friday, 24th of march 2006. Now the collaagues of Vienna University suggest to shift the date to the 7th of march due to a conference about engery effience in railways, which may be interesting for some RailML-participants. What do you think about this change, are you interested? You will find some information (in German language only) about this Vienna University-conference at [http://www.ove.at/akademie/pdf/2006-03-9\\_10ProgEntw.pdf](http://www.ove.at/akademie/pdf/2006-03-9_10ProgEntw.pdf) and <http://www.ove.at/veranstaltungen/default.htm> (select the title "Energieeffizienz im Eisenbahnwesen").

I will be happy for quick answers by mail or by this group, because I will publish the minutes of the last meeting and the registration page for the next RailML-conference until the end of this week.

Best regards,

--

Dear All,

I suggest to shift the RailML meeting to the 8th of march and not to the 7th because the conference start the 9th of march.

Best regards,  
Martin

Dear Colleagues,

I would also prefer the 8th if it's possible, otherwise the 7th is also ok.

Best regards

Ulrich Linder

Sorry, but as far as I know, the 8th of march is not possible due to  
some time conflicts.

Would you prefer the 7th or the 23rd then?

Vasco

Dear colleagues,

due to the answers of (only two) RailML-fellows we will shift now the  
next RailML-meeting to the 7th of march (Tuesday). The place will be  
at SIEMENS Austria in Vienna. We will publish the registration form  
within the next days on [www.railml.org](http://www.railml.org). I think, we will start at 10  
a.m. and will finish 4 p.m. latest.

Our colleagues from Vienna told me, that there will be another big congress in Vienna on these dates, so please book your travel and your flights early.

Best regards,

Dear Colleagues,

I would prefer March 28th. The conference is not of special interest for me.

Too late ???

Best regards,

Heidrun Jost
