Hallo,

I have posted the latest version 0.94 of rolling stock scheme on the server (refer to http://www.railml.org/genesis/rollingstock/index.221204.html) and kindly ask you for your comments as I
intend to release version 1.0 in end of February 2005.

The main structure will then not change anymore, however, I expect additions in the subtree <diesel> and maybe getting more specific in those parts of <math>.

Regards,

Joerg von Lingen
