Hell all,

Dirk Bräuer has added some very helpful content to the Wiki following
our developer meeting in Dresden. I have added some points for
discussion regarding the following Wiki pages:

http://wiki.railml.org/index.php?title=Diskussion:TT:stopDes cription
http://wiki.railml.org/index.php?title=Diskussion:TT:trainPa rt
http://wiki.railml.org/index.php?title=Diskussion:TT:Train_C oupling_And_Sharing

Please add your comments to the discussion there. Thanks!

Best regards,

Philip

Dear Philip and dear all,

do we really want to discuss such problems as the stopDescription issue
in Wiki? I think it is more a question for the forum here.

I think we should only write into Wiki which is agreed in the forum, or at least agreed to be an unsolved problem in the forum. But no general questions.

Please don't let us "spread" the information all over.

With best regards,
Dirk.

I agree with Dirk to keep discussions in the forum and only put agreed issues into the wiki.
@Philip: it would be nice of you to open some forum discussions on these topics.

@all: I guess there is no mechanism to "agree" on something in the forum, is there? This might be a valuable effort (of the coordinators?) to gather open issues and give a proposed solution for the timetable/infrastructure workshops.

Best regards
Burkhard
