I have been asked by Christian Rahmig to produce the enumeration list for the Norwegian loading gauge for railML3. We have three value list. One international based on a UIC standard. One national based on CEN standard 15273 (with only one value) and one national lauding gauge value (with also only one value). Thus we should be able to define one or more defined enumeration list (international/national). The values are defined on a line section level.

Our Norwegian values are:

Name of Norwegian list: "Internasjonal profil"
Suggestion for univocal enumeration UUID: "UIC-596-5"
List values (as used/listed in Norway http://orv.jbv.no/ns/doku.php?id=vedlegg:internasjonal_profil):
P80
P77
P73
P70
P60
C80
C77
C73
C70
C60
P410
P407
P403
P400
P390
C410
C407
C403
C400
C390
Not verified

Name of Norwegian list: "JBV NO1 - prEN 15273 Dynamisk profil"
Suggestion for univocal enumeration UUID: "EN-15273"
List values (as used/listed in Norway
 http://orv.jbv.no/ns/doku.php?id=vedlegg:jbv_no1_-_pren_1527 3_dynamisk_profil):
NO1

Name of Norwegian list: "Multipurpose profil"
Suggestion for univocal enumeration UUID: "NO:TRV-520-5-5a"
 https://trv.jbv.no/wiki/Underbygning/Prosjektering_og_byggin

In the Netherlands only P80 and C410 are used currently.
