Subject: Question concerning visualisation
Posted by Heidrun Jost on Fri, 12 Jan 2007 08:04:13 GMT

Hello,
a question concerning the visualisation of tracks.

Inside of the visualisation part it is possible to define
a x- and y-coordinate of each track element.
In case of the track net below the tracks a and b are being displayed
overlapped.
How to get the visualisation like the picture below?
There are no other elements on tracks a and b.

```
            a
     --------------------
    /        b         \
|--oo--------------------oo----------------|
```

Best regards,
Heidrun Jost
