## Subject: [railML3] Make <track> @type optional Posted by christian.rahmig on Mon, 17 Jan 2022 13:28:05 GMT View Forum Message <> Reply to Message

Dear all,

within the ETCS use case working group it was discussed that the attribute <track>@type, which currently is a mandatory attribute, shall become optional (see [1]). A corresponding Git issue has been filed in our railML development system [2]. If you have any additional remarks and requirements on this topic, please bring them up here in the forum.
