Hi Andreas and others,

How about this topic? I want to resume the discussion.

I currently don't see a generic "role-list" for railML 2.2 as there are
already different positions in the railML-tree for this purpose (not in
a separate list).

Susanne Wunsch <coord@common.railml.org> writes:

Do you need some additional "contractor" at the 'trainPart' level?

Other opinions, comments, remarks...?

Kind regards...
Susanne
