Dear railML community,

It is the first time that I post something in this forum and therefore I would like to introduce myself.
My name is Lucas Schubert and I work for the German Aerospace Center (DLR) as a researcher
at the Institute of Transportation Systems.
A few of you know me already from the last RailML Conference in Bern and the UIC
RailTopoModel/ RailML Conference in Paris last year.

I hope that we can contribute to make RailML even better.

Kind Regards,
Lucas Schubert
