Dear all,

I created a Trac ticket for this issue ideally to be solved with railML 2.4 [1].

Am 22.02.2018 um 13:23 schrieb Christian Rahmig:

- > In railML 2.x we have an attribute <track>@mainDir that describes the
- > preferred driving direction on that track. Possible values are "up",
- > "down", "unknown" and "none" and they always refer to the track
- > definition direction (trackBegin to trackEnd).
- >
- > The question to be answered:
- > Is the information relevant for any use case? Who uses @mainDir and for
- > what?

[1] <https://trac.railml.org/ticket/324>

Best regards

Christian
