Thank you both, Torben and Dirk, for discussing the point.

At the moment you can have "seats" when using "class1/2/3" with a count. This was described in wiki
(https://wiki.railml.org/index.php?title=RS:places).
Concerning "toddler" vs. "stroller" it was unclear description in wiki as trains would not have particular baby seats
but places to store the accompaining prams/stroller.

The suggestions from Torben are sensible but would require restructuring of <places> and <services> which cannot be done
in 2.4 due to compatibility reasons. In addition both elements are used also in TT and it has to be coordinated with them.

BTW there was already a forum post (https://www.railml.org/forum/index.php?t=msg&th=562& start=0) on similar issue with
resulting changeset [795].

Regards,
Dr.-Ing. Jörg von Lingen - Rollingstock scheme coordinator
