Subject: Re: infrastructure "state"
Posted by   on Thu, 08 Nov 2018 08:19:02 GMT

Dear all,

Unfortunately I have only now noticed during the review of the wiki
pages for the <state> element that there is a new "state" attribute in
railML2.4 that de facto replaces or extends the previous "disabled"
attribute. The question for me is how to deal with the old "disabled"
attribute. It's certainly too late to declare it "deprecated with
version 2.4" now. Therefore, I would suggest at least to document in the
wiki that "disabled" and "state" must not have any contradictions. If
possible, only one of the two attributes should be used at a time.

Kind regards
Christian Rößiger
