Dear Torben,
Dear all,

I don't know why Torben's link did not become clickable, so I'll try to post it again, as well as the related trac issue:

Forum: <https://www.railml.org/forum/index.php?t=msg&goto=1102>

Trac: <https://trac.railml.org/ticket/178>

I have not found any further context, and in the old forum thread a "vehicleOwner" value was also suggested, but it was apparently not included at the end. Are there anyone in the community who can provide (best practice) examples of current usage? Would Torben's suggestions break any current functionality?

In addition to Torben's suggested changes, I would as if we really need both <railwayUndertaking>, <vehicleOperator> and <operationalUndertaking>. I propose to also deprecate at least one of the last two. Again, please comment!

Best,
Thomas
