Subject: Re: @categoryPriority of <category> in version 2.5 / Extension of train part
Posted by huerlimann@opentrack.ch on Mon, 06 Apr 2020 09:44:13 GMT

Dear Community

I also recommend to keep an information about the priority of a train category in a way. I do not remember why it was defined as a string, but an integer value would also make sense. And as a not so elegant solution an integer in string format (e.g. "3") can be used. I also recommend to use the rule that the lower value means a higher priority.

Best regards

Dani
