Hi all,

I implemented the change following the requirement to support manual triggers according to Dirks suggestion. The current version can be reviewed under <https://svn.railml.org/railML2/branches/passengerinfo-at-stations/>. Or if you prefer the integrated version of all 2.5 timetable changes so far under <https://svn.railml.org/railML2/branches/railML2.5-dev/>. Please feel free to comment.

Best regards, Milan
