Hi all,

I wanted to update the community on what happened regarding this topic; After the last post we discussed this in the TT-developer group. We came to the conclusion that since there actually is usage we will not deprecate this attribute. However we decided that we improve the wiki documentation by adding a best practice description (<https://wiki2.railml.org/index.php?title=TT:category>). There will be no change to the xsd regarding this issue (thus no trac ticket).

Best regards, Milan
