Dear Torben and Dirk,

I updated the Trac ticket #362 [1] with a railML 2.5 solution proposal based on your feedback here in the forum. Please feel free to review and confirm the way of modelling.

For distinguish between different construction types of the car ramp, I suggested to introduce a new attribute <serviceSection>@rampType with possible enumeration values "flat" and "metalBridge". What are your comments on this proposal?

[1] <https://trac.railml.org/ticket/362>

Thank you very much and best regards
Christian
