Subject: trainProtection and equipmentUsage
Posted by Andreas Tanner on Thu, 15 Mar 2012 12:22:20 GMT

Hello friends of RailML,

the trainProtection element offers a somewhat rough classification of
train protection equipment for tracks. On the other hand, in the
timetabling scheme we have the <equipmentUsage> of a trainPart where a
predefined list is offered. I think this should be harmonized.

Best regards

Andreas Tanner.
