In the Belgian railway five different speed panels types exists :

- Announcement
- Origin
- reference
- End_zone_green
- End_zone_yellow

An example will be provided in the next days to illustrate these types.

It would be nice to have the <speedPanel> element in a next version of railML, and with the following types

- announcement
- execution
- repetition

In order to make the connection with the speed profile on the tracks, a reference from the <speedPanel> to the <speedChange> is needed.

[de: Es wird ein Element fuer Geschwindigkeitstafeln/Lf-Signale benoetigt. Sie sollten eine Referenz zu dem entsprechenden <speedChange> haben. Zudem werden obige Typen zur Charakterisierung empfohlen.]
