Subject: "default" attribute raises implementation problems

Posted by Susanne Wunsch railML on Tue, 15 Nov 2011 09:05:33 GMT

Hi,

Some years ago there was already some issue with "reserved vocabulary"
by programming languages.

The "default" attribute (in 'epsgCode' element) raises implementation
problems in the .NET environment.

Maybe we could rename it to "general" or so with the next major
release.

This way I would forbid "default" as element/attribute name or
enumeration value in our "Coding Policy". [1]

Any hints, questions, remarks, comments, +/-1, welcome. :-)

Kind regards...
Susanne
