Subject: new draft V1.1-R2

Posted by Joachim Rubröder railML   on Fri, 28 Nov 2008 14:38:01 GMT

Hello,

as introduced on our 14th meeting in Berlin there are some major changes
planned in the timetable schema.
A new draft (Version 1.1-R2) could be seen on the developer side. There
are examples included in order to get an impression.

Main changes are:
- "trainParts" as basic parts of a train with fix "formation" and
"operatingPeriod"
- "trains" for commercial/operational trains are referencing such
trainParts

This is how the future version 2.0 (in march 2009) is intended to be
structured!
So please have a look and post your inputs.

Kind regards,
Joachim
