Subject: current work / new infrastructure schema Posted by Matthias Hengartner on Wed, 28 Jan 2004 13:21:25 GMT View Forum Message <> Reply to Message

Hello,

Ulrich Linder is currently working on a new draft of the infrastructure schema. He's going to post it within the next few days.

Among other things, there will be some changes in the implementation of switches and connections.

Furthermore, Ulli started to write the documentation of railML.

I'm looking forward to a exciting discussion.

Best regards Matthias Hengartner
