Hello,
in figure 72 of IRS 30100 the class NonLinearElementPart is mentioned.
I do remember such class and the class LinearElementPart from the RTM Draft used for Aggregation and Disaggregation.
But in the IRS 30100 these classes are missing completly (except for figure 72).

Kind regards
Felix

Dear Felix!

Figure 72 does not visualise the current version of the model indeed.
This mistake in the final production was noticed before and will
resolved in the next version.

Thank you very much
Christian
