Hello,
table 15 (ch 6.4.7) is redundant to table 13 (ch. 6.4.5).
In contrast LinearLocationCoordinate does not repeat the attribute table of its parent class
LinearLocation (table 16 in ch. 6.4.8).
Should be uniformly!?

Kind regards
Felix

Dear Felix!

Your observation is correct. The chapter will be modified.

Best regards
Christian

Not taken into account for the IRS30100 September 2016 correction. It is an inconsistency rather than an error. I prefer to minimize the "optical" changes, and focus on undisputable "clerical errors". But in any case, thanks for pointing it out; we'll keep the correction for the next revision.
