Hi,

I enjoy using the Newstap app on iOS for this forum.

It has worked great for half a year.

Since one week I get the error message: «Error connecting to the server». The Webservice of the forum works fine.

Has something changed in the settings?

What are the correct settings?

Hi Torben, and anyone else struggling to connect,

If you use news.railml.org instead of forum.railml.org it should work.

Best,
Thomas
