Subject: [railML3]: signal lamps

Dear all,

in ticket #345 (https://trac.railml.org/ticket/345) was the need for defining
the signal lamps installed and used described.

I have developed an idea how to model the signal lamps in relation to the signal
aspects and to the signals as shown in attached file. The new element signalLamp
shall be in parallel to the signalAspect, i.e. under
specificInfrastructureManager and genericTypes.

Do you have any comments for this draft?

Dear all

Approach of [1] was enhanced in the presentation from 44-th railML conference [2] from

November 2024. There is now a ticket / issue in the GitLab [3] based on [2]. Please let us know if it does not meet your expectations.
